

Propylene is the cleanest, easiest to use, and one of the best provides the safest fuel. With most of your products, you have to pay extra to get the best results, but you can get a high level of quality like PROPYLENE, which still saves money. The average cost of PROPYLENE is usually lower than that of 50% acetylene. The versatility of PROPYLENE means that you only need to buy one fuel for many jobs. PROPYLENE can be used for manual cutting, machine cutting, flame hardening, metallization, brazing, welding, welding, preheating and stress elimination.

Other Names:	Propylene
MF:	C3H6
EINECS NO.:	204-062-1
Place of Origin:	China
Purity:	98%-99.5%
Grade Standard:	industrial Grade
Appearance:	Colorless
Application:	Industrial, Coolant/Energy Carrier
Brand Name:	ES GAS
Model Number:	ES-C3H6
